

INSTABOOM GS6 RAISES THE BAR ON OVER-HEIGHT HAZARD PROTECTION

The Complete GS6 Over Height Hazard Protection System

TRIED, TESTED, TRUSTED

*"This simple, but extremely effective **INSTABOOM GS6** solution is a game changer to over height protection on our highways sites"*

Kier Transport

INSTABOOM GS6 is an off-grid, solar hybrid portable laser detection unit that identifies any over height vehicle, triggering a mobile barrier to close in front of the vehicle and securing the lane from overhead strikes. This GS6 system profoundly improves work lane safety compared with traditional GS6 safety methods and is the only system to physically close the lane preventing a strike.

Used with any **INSTABOOM** or **SOSEC** barrier, **INSTABOOM GS6** protects all over height hazards on high speed networks, highway closures, track side projects and construction projects. **INSTABOOM GS6** is fitted with advanced telematics and a UK wide managed service providing instant email alerts of hazard alerts.

SAFE – reliable over height hazard protection system

TELEMATICS – instant hazard alerts and optimal performance

PORTABLE – designed for 1-2 person lift

SOLAR HYBRID – provides up to 20 days of run time between charging
